25X1A

in the distribution of units of the 9th Gds Tank Div in Neustrelitz, it agted that same source, since late November, reported the installations 25X1A only pertially pagenied.

It is possible that, at this unusual time of the year, as was implied by source, heavy elements of the decision may conduct firing practices in the Speck area which, however may last only a few days because of the season and the training program. Therefore, the occupation figures are doubted.
